

UKLPG Codes of Practice

UKLPG is the Trade Association for the LPG industry in the UK and is responsible for the industry's technical standards.

UKLPG's Codes of Practice, which provide guidance on best engineering and safety practice, are amongst the most recognised in the world. Topics covered include the transportation, storage, installation, operations and utilisation of LPG. The Codes have been developed by experts from within the industry in consultation with the UK Health & Safety Executive and other government authorities.

For more information on the Codes of Practice, please visit the UKLPG [website](http://www.uklpg.org) which lists all Codes including their retail price. The Codes are written in English for the UK market, however their application is transferable across the globe. All prices include packaging and postage within the UK - for European or international customers, additional postage may be charged dependent on the quantities ordered and the destination.

How to buy:

Codes are available to purchase via the following methods:

- Buy online from the UKLPG website: www.uklpg.org
- Phone UKLPG on +44 (0)1926 513750 and pay by credit card
