

Powering Africa: The Gas Option

Serena Beach and Spa Resort Mombassa
Kenya • 7 to 9 November 2011

PAGO2

Monetizing Africa's gas for Industrial Development:

Key Topics Include:

- Gas-to-power: Relative fuel efficiency, low emissions, quick construction timelines, and low capital costs makes gas the fuel of choice for many developers. What are the issues that inhibit the development of the gas-to-power sector?
- Is LNG a viable options for East Africa and what is the future?
- Technology: How can technology aid resource optimization and efficiency?
- Policy: East Africa is on the cusp of game-changing new gas industry but will its legislation and regulatory infrastructure stimulate investment?
- **Meet the decision-makers**

Powering Africa: The Financial Options

Serena Beach and Spa Resort Mombassa
Kenya • 9 to 11 November 2011

PAFO5

Africa's Stakeholder investment think-tank for power industry and finance executives:

Key Topics Include:

- Expanding power provision is increasingly a government priority. But how to fund it remains a Government headache. What are the options?
- Privatization is constantly revisited in Africa, and then abandoned. How has Nigeria facilitated stability to support large scale investment?
- Having withdrawn during the financial crisis, banks are now back: How are they now financing African power projects?
- Currency, corporate bonds, debt, stock markets: How will they influence the financing of power projects?
- **Do deals with decision-makers**

PAFO 4 (Fieldstone Africa (Pty) Ltd)
